Where is the Advanced Search!?

I didn't know the feature was there until I read about it. So I put it to the test on a couple of potential users. Even a seasoned IT professional clicked on the Menu, the magnifying glass icon before finally stumbling on the small down arrow after some flailing about. Clicking on the larger target of the SEARCH text naturally loads an unfiltered search.

Suggestion: Reduce the button height in half, and include Advanced Search underneath and always visible (Color: dark orange or possibly same blue text color as the existing Advanced Search dropdown).
